### PROFILE

I am a passionate young programmer, whose dream is to lead his own company. I have skills in various places, for example I love programming and editing videos. I always have some small programming projects running, but when I have time to do something else, then you will find me at the piano or in the gym. I am always open for new social connections and if you want to know me better, then feel free to contact me!

### EXPERIENCE

#### IT MAINTENANCE

*REHATEC | Schönaue | 2025 - PRESENT*

I am doing IT maintenance at the company Rehatec as a minijob while I am doing my high school diploma (Abitur). My main tasks are to keep the configurator on their website up to date and I also write some programs to optimize internal company processes. I found some great connections with Rehatec, for example I build connections with Hochwarth IT

### MORE ABOUT ME

I was born on the 9th February 2007 in Heidelberg (Germany) and grew up in Germany with my parents. In elementary school I found some friends but as I got to secondary school (Realschule) I had almost no friends and therefore I got friends with my computer and learned a lot of computer skills. I got decent grades and finished secondary school with an average of 1.7 (in the german grades system). After that I decided to go to a technical high school (technisches Gymnasium) and I got a lot of friends and after a year I also formed some connections with entrepreneurs or higher-ranking people and got a mini-job to earn money to build my own business. Meanwhile my parents divorced and my ultimate goal was to build a successful business to support my mom and so satisfy my own ambitions.

### MY GOALS

- build a successful business
- make working attractive again
- help companies (mainly start-ups) to ethically gain profit
